## CHAPTER III.

### REVENUE DEPARTMENT.

**Charge.** 1. Sardar Pratapsingh continued to be in charge of the department, during the year.

**Area, population and villages.** 2. The total area of the State is 1,417 square miles, of which nearly 500 square miles is under cultivation. The number of villages in the State is 778, including Jagir and Muafi villages. Patapur, a Jagir village, was resumed owing to the Jagirdar dying without any male issue. The widow of the deceased Thakur has, however, been liberally provided for.

**Colonization.** 3. This scheme was introduced in February last, with liberal concessions. Thakur Fatehsingh, Assistant Revenue Officer, was deputed to this work under the supervision of the Revenue Officer. The scheme worked successfully with the result that 13 houses were erected by new tenants. They brought under plough 424 Bighas of fallow land. 6 tenants emigrated elsewhere.

**Settlement** 4. The regular settlement staff was dismissed in January last and the unfinished portion of the settlement work was carried out by the ordinary staff. The expenditure incurred was about Rs. 50,000. Objections are being decided and the Revenue staff will now have to demarcate the boundaries.

**Settlement of Jagir and Muafi villages.** 5. The settlement of Jagir and Muafi villages is conducted at the Jagirdars' and Muafidars' request and cost. A special staff is engaged for this work under the Revenue Girdawar. 10 Jagir and 14 Muafi villages have been taken under survey. The area surveyed so far is 7,157 acres.

**Classification of area under diverse crops** 6. The table below shows the area under Kharif and Rabi crops :—

KHARIF			RABI		
Serial No.	Kind of crop	Area in acres.	Serial No.	Kind of Crop.	Area in Acres.
1	Makki — — —	22,908	1	Opium ... ..	230
2	Sai ... ..	16,956	2	Wheat ... ..	10,221
3	Til ... ..	5,436	3	Gram ... ..	7,011
4	Urd and Mung ... ..	2,708	4	Sarson ... ..	1,723
5	Cotton and Tobacco ...	207	5	Jira and Methi ... ..	612
6	Sugarcane ... ..	315	6	Sugarcane ... ..	767
7	Other crops ... ..	13,464	7	Other crops ... ..	5,180
8	Tilled land ... ..	4,574	8	Tilled land ... ..	169
Total ...		60,458	Total ...		25,958

The total area under cultivation was 92,416 acres. Of this, Dofasli (twice cropped) area is 22,813 acres. The actual area under cultivation is, therefore,  $92,416 - 22,813 = 69,603$  acres, which includes 3,685 acres of fallow (Nautor) land, brought under cultivation. The surveyed area under cultivation is 65,918 acres, i.e. 10,015 acres less than the settlement area of 75,933 acres. This is due to 10,015 acres of fallow land having been erroneously classed as cultivated land during the settlement.

7. The demand and collections for the last two years are compared below :—

Demand and collections.

Demand.			Collections.			Remarks
Details.	1925-26.	1926-27.	Details.	1925-26	1926-27.	
Land Revenue ... ..	2,13,084	2,13,982	Collections .. ..	2,10,728	2,13,870

The revenue collections during the year increased by Rs. 3,142 excluding Rs. 1,027 under suspension. The other receipts worked out to Rs. 33,095.

8. A comparative statement of live stock and wells is given below:—

Year.	Wells.	Plough cattle.	Sheep and goats.	Other cattle.	Population.	Remarks.
1925-26 ...	3,331	64,655	68,029	1,71,448	1,89,272	Census of 1921.

9. The statement below compares the Taccavi advances of the year of report with those of the previous year :—

Taccavi.

Year.	Wells.		Bullock.		Tanks.		Remarks
	No.	Amount.	No.	Amount	No.	Amount.	
1925-26 ...	12	710	62	1,163	1	100	
1926-27 ...	4	105	176	3,461	1	25	

The decrease in the number of wells is due to there being no need for digging wells owing to sufficient rainfall during the year.

Commercial  
crops.

10. The following table gives a comparison between the area under commercial crops during the year and those in the previous one :—

Crops.	1925-26 Acres.	1926-27 Acres.	Increase or Decrease	Remarks.
Cotton ... ..	340	117	—223	
Tobacco ... ..	140	99	—50	
Poppy ... ..	96	230	+ 134	
Jira and Methi ... ..	.....	642	...	

Poppy cultivation has now been discontinued and efforts are being made to replace it by other crops.

Tree Plan-  
tation.

11. In the last report 4,716 Mango and 5,043 Mahua trees were shown to be thriving at the close of the last year. During the year 37,434 Mango and 37,385 Mahua trees were planted.

## Registration.

12. 140 documents of the value of Rs. 53 730 compared with 153 of the value of Rs. 37,892 of the last year were registered.

Hired  
Bullocks.

13. The number of hired bullocks was 1,176 against 1,069 of the previous year. The grant of Taccavi on a liberal scale for the purchase of bullocks has not discouraged the practice of hiring bullocks as the Banjaras generally prefer to hire bullocks to their tenants during the rainy season.

Village  
Forest.

14. Village forests mainly supply the needs of the agriculturists. Timber is given free for implements of husbandry, and on a nominal charge for building huts and houses. The inspection work of village forest area is done by Patwaries and superior officers.

Revenue  
cases.

15. The total number of cases to be decided was 704, including 176, which were pending from last year. Of these 563 were disposed of, leaving a balance of 141.

Camel  
grazing.

16. Passes for the grazing of camels are given by the department, but the revenue derived under this head is credited to the State Treasury under the head 'Forests.' 112 passes giving an income of Rs. 4,450-4-0 were issued during the year compared with 111 of last year, which gave an income of Rs. 4,407-8-0.

Prices of  
food grains

17. Prices of principal food grains at the Capital are shown below:—

Wheat.		Maize.	
January.	July.	January.	July.
12 seers per rupee Imperial.	15 seers per rupee Imperial.	28½ seers per rupee Imperial.	27½ seers per rupee Imperial.

Maize is the staple food of the poor. An embargo is placed on the export of food grains in the shape of prohibitive export duty with the result that prices are easy as compared with those in the neighbouring States.

18. The general health of the people was on the whole good.

General health.

19. Appendix No. I at the end gives the rainfall recorded at the various rain gauge stations in the State.

Rainfall.

20. An experimental agricultural farm, for which an area of about 16½ Bighas has been reserved in the Udaibihar Gardens, was started and Dehra-Dun and Pilibhit rice, sweet Juwar, ground nuts etc. from the experimental farm at Partabgarh were sown. The experiments proved successful and it is hoped to carry experiments on a larger scale in selected villages from the next year.

22. At the close of the previous year the number of the estates under the Court of Wards was 21. 3 more were added during the year, making a total of 24. One of these was released and the number at the close of the year was 23. The total income from them at the usual 10 per cent charge was Rs. 6,160 against Rs. 5,650 and the expenditure was Rs. 4,134 against Rs. 3,464 giving a percentage of 67.1 compared with 61.3 of the previous year. The Thikanas of Kua, Vamasa, Nandli, Khumanpur, Gada Venjania and Sabli were handed over to their respective Wards for practical training. Their work proved to be satisfactory and there were no complaints. It is proposed to release Bankora during the next year.

23. 18 of the Wards are below 21 years of age. 5 of them are inmates of the Biscoe Rajput Boarding House at the Capital, 3 are being educated at village schools, 1 is studying at the Mayo College, Ajmer, 1 is a mere child and the remaining 8 have left school. They are being trained for their work at their own Thikanas. Most of the Thikanas are saddled with debts.

The decrease is chiefly due to there being no demand for grass, which is generally the case in good years, and the diminished export of timber and bamboos to foreign territories.

3 Special areas in different circles have been selected for the growth of valuable timber and fruit trees. Improve ments and plantations.

During this year about 400 Sisam were planted in Chundawara nursery in addition to 600 Mango and 500 Mahua trees, which were planted in Bhadher Jungle and in the land near the Dhambola tank. Several of the mango trees were destroyed by insects

Experiments with lac cultivation on Khankra, Ber and Pipal were continued though without much success owing to climatic conditions being not favourable. Grafting with Ber was also tried.
